A very interesting article exploring the reasons for the I-35W Mississippi River bridge collapse. Why Buildings Fall Down by Matthys Levy and Mario Salvadori. Norton, 2002. The Silver Bridge was an eyebar-chain suspension bridge built in 1928 and named for the color of its aluminum paint. The bridge carried U.S. Route 35 over the Ohio River, connecting Point Pleasant, West Virginia, and Gallipolis, Ohio. On December 15, 1967, the Silver Bridge collapsed under the weight of rush-hour traffic, resulting in the deaths of 46 people. I-35W Bridge Collapse and Response Minneapolis, Minnesota August 1, 2007. This is Report 166 of Investigation and Analysis of Major Fire Incidents and USFA’s Technical Report Series Project conducted by TriData, a Division of System Planning Corporation under Contract (GS-10-The I-35W (Interstate 35 West) bridge over the Mississippi River in Minneapolis opened to traffic in 1967. Thousands of vehicles drove across it every day, but no one imagined that a mistake in the bridge’s design, made over forty years prior, would have such disastrous consequences on one summer evening in August of 2007. The book starts with the collapse of a bridge outside Lima, Peru. Five people were on the bridge and fell to their deaths in a gorge. A monk named Brother Juniper uses the collapse for an investigation into the will of God. The bridge, you see, has stood for many years and safely allowed many thousands to cross the gorge.
